

Join the Team Transforming the Way Strength Athletes Recover From Injury

Strength Physiotherapy is redefining what rehab looks like for lifters. We're a remote team supporting strength athletes through world-class, evidence-based coaching that gets them back to training pain-free and stronger than ever. If you're passionate about helping people rebuild physically and mentally — and want to work with highly motivated athletes — this is your opportunity to make a real impact.

About Us

Strength Physiotherapy is a specialist rehabilitation team dedicated to helping people who love strength training recover from injuries and improve their performance. We provide personalised support and guidance allowing athletes to rehabilitate from the comfort of their own gym. We provide an evidence based world class rehabilitation service akin to that which you would get if you were a professional athlete. We empower athletes to regain strength, mobility and confidence helping them return to their training stronger than they've ever been.

Our exclusively online coaching service provides individualised support to ensure a safe and effective rehabilitation process. Programs are suitable for people of all experience levels and we work with a variety of strength sports most commonly, olympic weightlifting, powerlifting, bodybuilding and strongman/ woman. We help athletes who compete in these sports (or participate in others) all the way to recreational enthusiasts. We have a highly motivated population who love to train and are extremely bought into the process wanting to get better.

We are pleased to announce that we are expanding our team, looking to recruit a Specialist Rehabilitation coach, which is outlined in the following job description.

If you are interested please send your CV to our Founder Alex Dear (alex@strengthphysiotherapy.com). The next step in the process if you are successful will be a case study exercise followed by an interview.

We look forward to your application.
